

PACKAGING FOR THE NEXT GEN

Perfect Packaging for your Products

One-stop packaging solution for industrial and commercial needs. Our portfolio includes all kinds of Corrugated Boxes, Duplex Boxes, Foam Packaging and Vacuum Foaming Trays.

PRODUCTS

Customized and designed products for satisfying diverse packaging requirements.

MASTER CARTONS

Master Cartons are the best in class corrugated boxes, used for freight consolidations. The high-quality boxes of various dimensions allow any shipping products to be bundled and packed safely. Master Cartons are available in various dimensions and paper quality, which can be customized according to customer requirement. We possess the facility to manufacture 3 PLY, 5 PLY, 7 PLY, Narrow Flute, B-Flute and Jumbo Flute.

PRINTED MASTER CARTONS

Printed Master Cartons are crafted in any colour as well as design specifications. Available in various dimensions, these cartons are customized according to customer specifications.

INNER CARTONS

The inner carton is the box that each individual item comes packed in (the master carton is the box that contains all of the inner cartons). Inner Cartons are crafted in any colour as well as design specifications. Use of these high-quality boxes makes the shipping and moving job easier. The boxes are used for both household and industrial purposes.

DUPLEX BOXES

Duplex boxes are available in various designs, sizes, colors and finish. They are easy to fold and store and are durable and reliable. Commercial application includes packaging for bottles, bakery etc.

HONEYCOMB CARTONS

Honeycomb cartons are sturdy boxes that are made with inter-connected components referred to as cells. The high-pressure strength of honeycomb boxes makes it an ideal material for any type of industrial use. Honeycomb cartons are heavy-duty and lightweight. Made with high-quality honey-comb panels, these boxes are of high precision and industrial-grade quality.

CORRUGATED SHEETS

Corrugated paper sheets are used by packers and movers to wrap various kinds of products. The texture protects the products from wear and tear.

POLYURETHANE OR POLYETHYLENE FOAMS

Master cartons are used by various industries to ship a variety of products. Polyurethane and Polyethylene foams are excellent inlays that are used inside the master cartons. These provide a cushioning effect and helps in safe storage as well as content transportation. These foams are available in any shape or size according to customer's specification.

VACCUM FOAMING TRAY

Vacuum foaming trays are effective for packing small items in master cartons. These can be used for packing any household and industrial-grade products, which are smaller than usual, effectively. These can be customized according to customer requirements.

ABOUT US

Established in 2005, Prime Packers are one of the top-notch manufactures, designers and distributors of corrugated boxes, cardboard boxes, honeycomb boxes and polyurethane foams for domestic as well as international markets. Equipped with most modern manufacturing facilities and cutting edge technologies, we are offering customized and designed products for satisfying diverse packaging requirements.

We are one of the very few packaging products manufactures certified with ISO 9001:2015, that satisfy the demands for a perfect quality management system. As a one-stop solution for packaging requirements, we deal with the designing, printing, manufacturing & distributing of a wide range of packaging materials. Serving diverse industries and sectors, we make sure our clients are served with right packaging solutions to satisfy their exact necessities.

WHAT MAKES US SPECIAL

CUSTOMIZABLE

All our products can be tailor-made according to our customer needs. Design, Dimension, Quality of Paper etc. can be fully customized.

LAB FACILITY

We possess a highly developed in-house testing lab to ensure that all our products meet the required quality standards and are crafted as best.

ISO 9001:2015

We are a packing solution manufacturer with ISO 9001:2015 certified manufacturing plant. The certification reflects our commitment to quality.

OUR QUALITY PRINCIPLES

We Follow QCDS Principle

QUALITY

We value quality as our trademark and make sure all our products undergo thorough quality checks in our most modern in-house testing lab.

COST

Through continuous process improvements and wastage reduction, we ensure the product's costs are kept to the minimum, which is passed on to our customers as well.

DELIVERY

What makes us really unique is our adamant and ardent attitude to deliver our products on time, with high quality, at anywhere across the world.

SUPPORT

We know that sales don't end up with product delivery. Hence, we ensure that our customers get the industry best after-sales support.
